Auto right clicker minecraft mod

I'm looking for a mod that adds a fake player in 1.10 MC. I try to automate sier from Ex Nihilo Adcensio for a custom modpack (with modified JSON files). Anyone know a block? Page 2Posted by4 years ago 17 comments Huge thanks to carlosmachina for revising my code to make this update possible! Additions:CTRL+J allows the user to change script settings at any timeAdd you cool down time with the slider from 2 to 40 seconds (to save food resources)Improvements:Cooling options are now set with Object, reduce encoding if something needs to be added/removed/editedFixes: Ask when reopening script (now default to reload)Error when CTRL+J was triggered another hourRight Click stuck until manually pressed pausepause/Resume triggered from outside the MC window Smart Auto Clicker v1.0.3 -09-November-2012 for Minecraft version 1.4.2. Latest version download: v1.0.3 Link1 Requirements: ModLoader 1.4.2 Intended audience: Both Single Player and Multi player How to use: 1. Press the M key to enable/disable auto clicker. 2. Press the key to open the configuration menu. The configuration menu allows you to change settings such as the click frequency and also the type of click. (See screenshot images of menu) If you click State, it can be changed in the configuration menu. Available modes are: * Auto single left click Example: This can allow you to afk and kill mobs on mob spawner farms' output area. * Auto single right click Example: This can be used for spam command characters on SMP servers. * Holding left click Example: This can be used to extract obsidian without holding your left mouse button. * Holding right click Example: This can allow you to afk on bone meal operated auto wheat farms. How to install: I want to automatically place items on walls in my ftb world. I have tried to use: block place (open blocks) block place (MFR) autonomous activator More suggestions anyone?? Dynamics tablet from Thaumic Tinkerer? Thaumcraft golems with use kernels can also work how would I go about coding the turtle (I don't have much computer ludging experience) Go to CC forums and look for the beginner guide I want to automatically place items on walls in my ftb world. I have tried to use: block place (open blocks) block place (MFR) autonomous activator More suggestions anyone?? what is wrong with these options? I'm guessing they don't work. I somehow doubt it's that simple it is, there may be few options: 1) there may be some unusual elements to be placed. strikes myself if even exists, but it is modded MC after all, so it is possible, in this case it would be nice to know em. 2) he plays on the server, in which case automatic block location is prohibited, so he would be better off asking people on the server. 3) he wants to place the head / trophies / what the wall, just because, in this case it is probably achievable with golems or turtles. redstone antics and wall o' activator can do the job as well. I somehow doubt it's that simple it is, there may be few options: 1) 1) may be some unusual items to be placed. strikes myself if even exists, but it is modded MC after all, so it is possible, in this case it would be nice to know em. 2) he plays on the server, in which case automatic block location is prohibited, so he would be better off asking people on the server. 3) he wants to place the head / trophies / what on the wall just because, in this case it is probably achievable with golems or turtles. redstone antics and wall o' activator can do the job as well. No, I play on an SSP world and as I mentioned is as RealSketch suggested - they do not work ... Reactions: RealSketch No, I play on an SSP world and as I mentioned is as RealSketch suggested - they do not work ... Can we at least know which subject you are trying to place, so that we can rule out that this is not the point that is the problem? Seems pretty pointless to speculate about all kinds of placement methods without knowing what point we're talking about. Reactions: RealSketch and Celestialphoenix Could we at least get to know what point you are trying to place so that we can rule out that it is not the point that is the problem? Seems pretty pointless to speculate about all kinds of placement methods without knowing what point we're talking about. Well, I think everything can go in a commodity frame, so we don't really need to know, but oh well, that would be nice. auto clicker Minecraft mod 10 MC.
